

Test :  
(RegEx & Porter)

Query: query expansion information retrieval

| Scalar product |           | Cosine measure |           | Jaccard measure |           |
|----------------|-----------|----------------|-----------|-----------------|-----------|
| N° doc         | Relevance | N° doc         | Relevance | N° doc          | Relevance |
| 4              | 0.9147    | 4              | 0.4037    | 4               | 0.2094    |
| 1              | 0.3592    | 1              | 0.1034    | 1               | 0.0539    |
| 5              | 0.2653    | 5              | 0.0728    | 5               | 0.0376    |
| 2              | 0.0663    | 2              | 0.0186    | 2               | 0.0093    |
| 3              | 0.0497    | 3              | 0.0184    | 3               | 0.0086    |
| 6              | 0.0497    | 6              | 0.0175    | 6               | 0.0083    |

Query: Ranking documents using LLMs

| Scalar product |           | Cosine measure |           | Jaccard measure |           |
|----------------|-----------|----------------|-----------|-----------------|-----------|
| N° doc         | Relevance | N° doc         | Relevance | N° doc          | Relevance |
| 2              | 1.1158    | 2              | 0.3124    | 2               | 0.1837    |
| 5              | 0.4565    | 5              | 0.1252    | 5               | 0.0665    |
| 1              | 0.3259    | 6              | 0.1054    | 6               | 0.0524    |
| 6              | 0.2996    | 1              | 0.0938    | 1               | 0.0487    |
| 4              | 0.1521    | 4              | 0.0671    | 4               | 0.0296    |
| 3              | 0.0856    | 3              | 0.0317    | 3               | 0.0149    |

Query: LLM-based solutions

| Scalar product |           | Cosine measure |           | Jaccard measure |           |
|----------------|-----------|----------------|-----------|-----------------|-----------|
| N° doc         | Relevance | N° doc         | Relevance | N° doc          | Relevance |
| 2              | 0.5815    | 2              | 0.2302    | 2               | 0.1262    |
| 3              | 0.1193    | 3              | 0.0624    | 3               | 0.0322    |
| 6              | 0.0596    | 6              | 0.0297    | 6               | 0.0151    |
